Analysis:

The 85th Percentile speed of 25.1mph exceeds the speed limit by 25% and is a good indicator that traffic enforcement could be justified. When compared to the results of September, when the average speed rarely went over the limit as traffic approached this area, the results suggest that the majority of vehicles (between 57-67%, depending on the day of the week) are failing to slow sufficiently to approach the Village Green. This is at all hours of the day and night and applies to nearly 16,500 vehicles, all going in the one direction. The device only records traffic going one way. Traffic in the opposite direction could potentially double this number. The SAM is now located at Position 3, Lynn Road towards Kings Lynn.
